

Document	Superfast Satellite For Communities summary & registration	
Date	7 Dec 14	
Ref / Issue	v1	p 1 of 1

Who's Who

- Connecting Devon & Somerset is the local body bringing broadband across the region.
- BDUK is Broadband Delivery UK, part of the Department for Culture, Media and Sport, delivering superfast broadband to the nation.
- Satellite Internet is the UK company who proposed this project for the BDUK Innovation Fund programme.
- SES runs the satellites. (Société Européene des Satellites www.ses.com).
- SBBS runs the Broadband Services Platform (SES Broadband Services).

What's What

- Superfast Satellite for Communities – SS4C – is the name for this project using both SDN and DTH to provide complete coverage of the area with superfast broadband.
- The project is commissioned by BDUK for Satellite Internet to support project areas selected by CDS.
- DTH is the technical abbreviation for the system where an individual home has its own individual dish and the service is directly connected: Direct To Home
- Astra Connect is the name of the broadband service from SBBS which uses DTH systems.
- SDN is the technical abbreviation for the system combining satellite to a node connected to a local distribution system (eg by wireless): Satellite Distribution Node.
- Astra Connect for Communities is the name of the broadband system from SBBS which uses SDN systems.

----------	--	------------	----------	----------

SS4C – The Project

A dish with wireless antenna will be installed on a local building.		
Premises which can receive the wireless signal will be connected with a small wifi antenna on the outside of their building and an Ethernet port on the inside.		
Premises which can't receive the wireless signal will be connected with their own dish and satmodem.		

Normal wifi routers or switches can be connected to the Ethernet port to connect other devices and share the connection.

Installations are scheduled to start in January 2015.

SS4C - The Services

There's a one-off connection charge of £99.95 inc VAT. Three levels of service are offered. Contract length is for 1 year initially, rolling 30 days thereafter.

	25M 5	25M 20	25M 50
Connection speed	up to 25Mbps	up to 25Mbps	up to 25Mbps
Traffic per month	5GB	20GB	50GB
Monthly subscription	£22.95	£42.50	£69.95
FreeZone Option	£7	£7	£7
VOIP Channel Option	£7	£7	£7

FreeZone offers unlimited data traffic at best efforts speed between 23:00 and 07:00. Adding the FreeZone option means you can schedule large downloads at night and keep your daytime data amounts free.

The VOIP Channel option adds one VOIP channel for standard SIP traffic with unlimited VOIP data and top QoS.

The Project Area

In the first phase, the SS4C Project is available to selected postcodes in the Luxborough area. If you register, we can let you know whether your address is included in the first phase and, if not, when coverage is likely for you.

To Enquire / Register
